EVERY 15 MINUTES—Bodhi Walker-Heubel's mother embraces her son as she was reunited with him during the "Every 15 minutes" assembly March 28. He was a victim in the staged accident in the "Every 15 minutes," a federal program designed to show students about the powerful consequences of driving under the influence of alcohol, drugs, or while texting. The lesson is taught with a vivid staged accident the day before. Then preselected students were removed from class throughout the remainder of the day every 15 minutes. All the selected deceased were taken to an overnight camp without any outside contact for 24 hours and reunited with family and friends at the assembly. Although the parents knew it was staged, having Sheriff's Deputies arrive at their homes to inform them their child is deceased had a powerful impact. Several parents shared letters written that night. (NEWS)

WHALE—Twelve Mendocino High School students help biologists unearth the bones of the blue whale that died in October 2009 after it collided with a research vessel. The skeleton will be transported to a warehouse where it will be cleaned as funds are raised to build the Noyo Center for Science and Education in Fort Bragg, CA. Once assembled, this will be the sixth complete blue whale skeleton in the U.S.
